

ITAC Metal Buildings offers pre engineered metal building systems (PEMBs). These systems serve as viable building solutions for your new agricultural, manufacturing, industrial or commercial facilities.

ITAC Metal Buildings can provide PEMB solutions on a design/build, design/construction management or engineering-only basis.

A Wide Range of Capabilities

ITAC Metal Buildings leverages the time proven method of single-source accountability to provide full scale metal building engineering, procurement and self perform/general contracting construction services all under one roof. We offer:

Full Service Engineering

- Civil/Structural/Architectural
- Mechanical/Process/HVAC
- Electrical
- Instrumentation and Process Controls

Construction Services:

- PEMB site work, foundations and ancillary structures/systems
 - Road Ways
 - Parking Lots
 - Site Utilities
 - Fencing
 - Grade Beams
 - Retaining Walls
 - Slabs On Grade
 - Machine/Equipment Foundations
 - Under Slab Drainage
 - Mezzanines
 - Crane Runways
 - Jibs
 - Crane Workstations
 - Office/Laboratories
 - In Plant Offices
 - Approach Structures/Aprons
 - Electrical Equipment Rooms
 - Control Rooms

- Balance of plant (BOP) work – Electrical/Mechanical & Process/Fire Protection

ITAC Metal Buildings' engineering staff can help assess which type of metal building is the right choice for your particular project. Options are expansive and range from basic storage/warehouse/maintenance buildings to highly complex multipurpose facilities, green field or retrofit.

Leading Metal Building Product Lines

ITAC Metal Buildings offers systems that are developed by some of the world's most advanced metal building product lines. Offering extensive warranties, product innovation, and AISC MB certification, our products offer great economic viability without sacrificing quality.

Go Green

ITAC Metal Buildings is proud to be an active participant in the green movement. By using highly sustainable products we are able to limit the use of non-sustainable construction materials while producing energy efficient buildings composed of 100% recyclable steel primary frameworks.

A Builder You Can Trust

With 20 years of experience assisting a wide range of clients, ITAC Metal Buildings can help you design and build the right solution.

If a pre-engineered metal building is in your company's plans, contact ITAC Metal Buildings today to turn this prospect into reality.
